Dear ADMA Scholarship Committee,

I would like to express my gratitude for selecting me to receive the 2011 ADMA scholarship. Your support of my vocation and the field of aviation speaks volumes to me of your passion for aviation in the world. Your support and confidence is what makes pursuing a career in aviation possible for me, and for that, I cannot fully express my gratitude!

I have the privilege of pursuing the major of Flight Science with a concentration in missionary aviation at LeTourneau University ([www.letu.edu](http://www.letu.edu)) in Longview, TX. Here, in my junior year of school, I have been able to complete my private pilot certificate and tail wheel endorsement, and I am currently pursuing my instrument rating this semester with intentions of pursuing my commercial multi-engine certificate this spring and my commercial single-engine/high performance this next fall. In addition, I will be completing my A & P certificate this following school year, earning the necessary maintenance hours for the certificate this summer.

I am excited about completing my bachelor's degree here at LeTourneau, but I am also enthusiastic about my future in the aviation industry. My aspiration is to be missionary pilot overseas with a humanitarian or missions organization such as Missionary Aviation Fellowship (MAF). To earn the necessary flight and maintenance hours, however, I anticipate spending a few years stateside in the industry.

Once again, I cannot thank you enough for your support! An organization that cares for the future of aviation professionals is an organization that deserves commendation, and I am honored to receive your support. I pray that God will continue to bless your efforts in the aviation industry, as I know He has blessed me with you.

Sincerely,

Daniel Wilson  
Junior, LeTourneau University
