August 1, 2016

Dear ADMA Scholarship Committee Members:

Thank you so much for awarding me this scholarship. This will help me achieve my goal of become a certified Airframe and Powerplant Mechanic. Being awarded this scholarship will help to ease the burden of student loans that I have to pay.

I began studying aviation maintenance at North Idaho College last year. Over the course of the last year, I have realized that I am really enjoying what I am doing and would like to pursue maintenance as a career. This fall I will be attending the Pennsylvania College of Technology to further my education. While at Penn I will be working towards a 4-year degree in aviation maintenance. I am very excited to explore the opportunities Penn College has to offer.

When employed I hope to start of working for a small regional carrier and then eventually work at the major airlines. My ultimate goal is to become a flight maintenance engineer who travels with large aircraft around the world and performs light maintenance on them. Once again, thank you so much for awarding me this scholarship.

Sincerely
Brian Maestri
