Dear ADMA International Scholarship Committee,

I am extremely honored and excited to be the proud recipient of this prestige's award. I want to extend my sincere gratitude for having this scholarship available. It will help pay a significant part of student loans I have accrued over the last 2 years. I have obtained my Associate degree as well as my Airframe license and in process of obtaining my Powerplant license. I am currently working for an MRO in North Idaho and plan to further my career working on helicopters and avionics.

My dream job is to work for Rolls Royce in England working on their Trent 1000 line. I know it will be a long road ahead for me and scholarships like this will surely lighten the load. Thank you again to all who have made this scholarship possible. I am extremely excited to be in this advancing and great career field and love my job! Again, thank you very much.

Sincerely,

Brian Forstrom
